Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Simopoulos et al. (U.S. patent # 4,595,861).

Simopoulos et al. disclose the claimed invention (figure 3), including an inverter (column 1, line 58-61), a DC voltage (column 2, line 5-10) and transformer, first and second oscillator, first and second frequencies (column 5, line 1-65).

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2838

2. Claims 1-3 and 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herzog (U.S. Patent # 3,869,639) in combination with Matsuda et al. (U.S. Patent 5,453,667).

Herzog discloses the claimed invention an inverter for providing AC voltages having two different frequencies (figure 1 and claims 1-4), except the utilization of the technique for the first switch selectively passes the DC voltage to the first and second oscillating circuit. Matsuda et al. teaches the utilization of the similar technique for the first switch selectively passes the DC voltage to the first and second oscillating circuit. It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Herzog's lighting system by utilizing the technique taught by Matsuda et al. for the purpose of suppressing interference noise in lamp lighting apparatus.

***Allowable Subject Matter***

3. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.
